dicator definitions	
ctive participants with approved plans	Number of active participants who have an approved plan and reside in the region / have supports relating to the support category in their plan
egistered active providers articipants per provider rovider concentration rovider growth rovider shrinkage	Number of registered service providers that have provided a support to a participant within the region / support category, over the exposure period Ratio between the number of active participants and the number of registered service providers Proportion of provider payments over the exposure period that were paid to the top 10 providers Proportion of providers for which payments have grown by more than 100% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered Proportion of providers for which payments have shrunk by more than 25% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered
otal plan budgets ayments tilisation	Value of supports committed in participant plans for the exposure period  Value of all payments over the exposure period, including payments to providers, payments to participants, and off-system payments (in-kind and Younger People In Residential Aged Care (YPIRAC))  Ratio between payments and total plan budgets
outcomes indicator on choice and control as NDIS helped with choice and control?	Proportion of participants who reported in their most recent outcomes survey that they choose who supports them Proportion of participants who reported in their most recent outcomes survey that the NDIS has helped with choice and control
	The green dots indicate the top 10% of regions / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively well under the metric under consideration  The red dots indicate the bottom 10% of regions / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively poorly under the metric under consideration

Note: A utilisation rate may be above 100% due to	the fungionity of core supports. This refers to the ability of participants to use their funding flexibly between different support types, albeit within certain limitations.
Indicator definitions	
mulcator definitions	
Active participants with approved plans	Number of active participants who have an approved plan and reside in the region / have supports relating to the support category in their plan
Bardatana di anthua mandidana	
Registered active providers Participants per provider	Number of registered service providers that have provided a support to a participant within the region / support category, over the exposure period Ratio between the number of recibicalisated service providers  Ratio between the number of active participants and the number of recibicated service providers
Provider concentration	Ratio between the number of active participants and the number of registered to regist
Provider growth	Proposition of providers for which payments have grown by more than 100% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered
Provider shrinkage	Proportion of providers for which payments have shrunk by more than 25% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered
-	
Total plan budgets	Value of supports committed in participant plans for the exposure period
Payments	Value of all payments over the exposure period, including payments to providers, payments to participants, and off-system payments (in-kind and Younger People In Residential Aged Care (YPIRAC))
Utilisation	Ratio between payments and total plan budgets
Outcomes indicator on choice and control	Proportion of participants who reported in their most recent outcomes survey that they choose who supports them
Has NDIS helped with choice and control?	Proposition of participants who recorded in their most recent outcomes survey that the NDIS has helded with choice and control
_	
	The green dots indicate the top 10% of regions / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively well under the metric under consideration
	The red dots indicate the bottom 10% of regions / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively poorly under the metric under consideration
Note: For some metrics - 'good' performance is conside	ered a higher score under the metric. For example, high utilisation rates are considered a sign of a functioning market where participants have access to the supports they need.
	erica a ingirer score under the metric. Pro example, rigin unissation rates are consistence a sign of a functioning market where participants have access to the supports they need.  Insidered a lower score under the metric. For example, a low provider concentration is considered as sign of a competitive market.
r or other metrics, a good performance is co	inducted a former storre among the linearies. If or examples, a form profession is considerated a sign of a compositive market.
