Note: A utilisation rate may be above 100% due to the	e rungionity of core supports. This refers to the ability of participants to use their running nexibly between different support types, albeit within certain innitiations.
,	
A - M	
Indicator definitions	
Active participants with approved plans	Number of active participants who have an approved plan and reside in the region / have supports relating to the support category in their plan
Registered active providers	Number of registered service providers that have provided a support to a participant within the region / support category, over the exposure period
Participants per provider	Ratio between the number of active participants and the number of registered service providers
Provider concentration	Proportion of provider payments over the exposure period that were paid to the top 10 providers
Provider growth	Proportion of providers for which payments have grown by more than 100% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered
Provider shrinkage	Proportion of providers for which payments have shrunk by more than 25% compared to the previous exposure period. Only providers that received more than \$10k in payments in both exposure periods have been considered
Total plan budgets	Value of supports committed in participant plans for the exposure period
Payments	Value of all payments over the exposure period, including payments to providers, payments to providers, payments (in-kind and Younger People In Residential Aged Care (YPIRAC))
Utilisation	Ratio between payments and total plan budgets
Outcomes indicator on choice and control	Proportion of participants who reported in their most recent outcomes survey that they choose who supports them
Has NDIS helped with choice and control?	Proportion of participants with deported in their most recent outcomes survey that the PIDS has helped with choice and control
rias Noio neipea with choice and control:	i Toportori di participante mio reporteu il aleni mosi reconi outcornes survey inaci ne reconi controli
	The green dots indicate the top 10% of regions / support categories when ranked by performance against benchmark for the given metric – in other words – performing relatively well under the metric under consideration
ē	The red dots indicate the bottom 10% of regions / support categories when ranked by performance against benchmark for the given metric — in other words — performing relatively poorly under the metric under consideration
Note: For some metrics – 'good' performance is considere	ed a higher score under the metric. For example, high utilisation rates are considered a sign of a functioning market where participants have access to the supports they need.
