Autism summary September 2022

ndis

Insights

646

As at 30 September 2022:

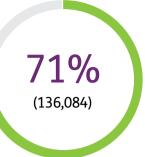

of the **554,917** active NDIS participants have a **primary disability of autism**, making it the **most common disability for NDIS participants**

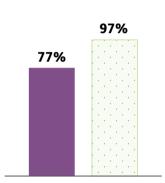

of participants with autism are aged under 15 years, with 100,658 (53%) participants aged 7 to 14 years

of participants with autism are aged under 25 years

of participants with autism **are male**

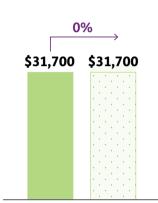

97%

of access decisions for applicants with autism resulted in the applicant joining the Scheme in the September 2022 quarter, compared to 77% of access decisions for all applicants

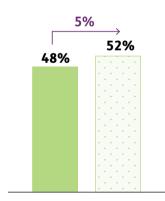

\$1.54 billion

of paid supports were provided to participants with autism in the September 2022 quarter, compared to **\$1.26bn** in the September 2021 quarter, an increase of 23%

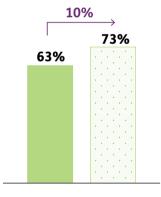

\$31,700

was the average payment for the 12 months to 30 September 2022 for a participant with autism, the same as the previous year

52%

of family/carers of participants with autism reported being employed at the participant's latest plan reassessment, a five percentage point increase compared to 48% at baseline⁵

73%

of family/carers of school children with autism (up to 14 years of age) felt their child had become more independent as a result of the NDIS at their most recent plan reassessment, a 10 percentage point increase from the first reassessment

71%

was the weighted average satisfaction rate for participants with autism over the 4 stages of the pathway

All participants Autism

"These days, I have a lot more confidence.
I get out more and I am learning to read."

Lleyton, 23

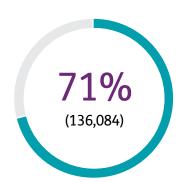

Section 1: Participants

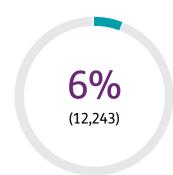

Overview

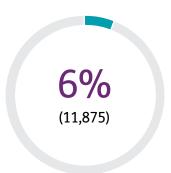

Of the **191,251** active participants with primary disability of autism at 30 September 2022:

were male, compared to 61% (or 341,220) for all participants

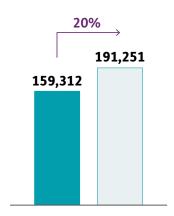

identified themselves as First Nations people, compared to 7% (or 40,842) for all participants

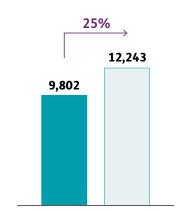

identified as Culturally and Linguistically Diverse (CALD), compared to 9% (or 50,968) for all participants

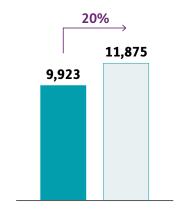

In the twelve months to 30 September 2022:

The number of active participants with autism has increased from 159,312 to 191,251, an increase of 20%

The number of participants with autism who identify as First Nations people has increased from 9,802 to 12,243, an increase of 25%

The number of participants with autism who identify as CALD has increased from 9,923 to 11,875, an increase of 20%

Access

In the quarter to 30 September 2022:

of access decisions for applicants with autism resulted in the applicant joining the Scheme, compared to 77% of access decisions for all applicants

access decisions have been made for applicants with autism (6,125 participants met access and are still active) "He is a very driven young man. He is proud of who he is. We all are."

Section 2:

Payments

Overview

In the September 2022 quarter:

In the same quarter last year:

the NDIS provided

\$1.54 billion

of paid supports to participants with autism

the NDIS provided

\$1.26 billion

of paid supports to participants with autism

The average payment³ per participant with autism was

\$31,700

for the 12 months ending September 2022 The average payment per participant with autism was

\$31,700

for the 12 months ending September 2021

For participants aged 18 years and over with autism

In the September 2022 quarter:

8%

were participants in SIL² 42%

of supports were paid to participants in SIL A year ago:

9%

were participants in SIL

45%

of supports were paid to participants in SIL

Comparing average payments³ for the same group of participants with autism between this year and last year⁴:

	Sep 22	Sep 21	Change (%)
Aged under 18 years	\$21,900	\$21,300	3%↑
Aged 18 years and over not in SIL	\$47,600	\$44,400	7% ↑
Aged 18 years and over in SIL	\$395,100	\$379,200	4%↑
All	\$33,300	\$31,700	5% ↑

Section 3:

Participant outcomes and satisfaction

Outcomes

The outcome results at 30 September 2022 compare baseline results to the latest results for participants with autism who have been in the Scheme for at least two years.⁵

Social and community participation

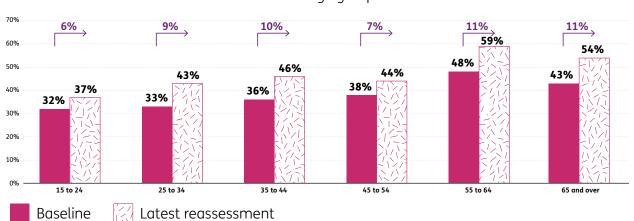

For participants aged 15 years and over with autism, 40% said at their latest reassessment that they were actively involved in a community, cultural or religious group in the last 12 months. This compares to 43% for the Scheme as a whole.

Comparing responses at the most recent plan reassessment (between two to six years after entry) with responses at Scheme entry (or baseline), there has been a:

- 7 percentage point increase from 33% to 40% for participants aged 15 years and over
- 9 percentage point increase from 35% to 44% for participants aged 25 years and over.

The chart below shows outcomes for different age groups.

Participant employment

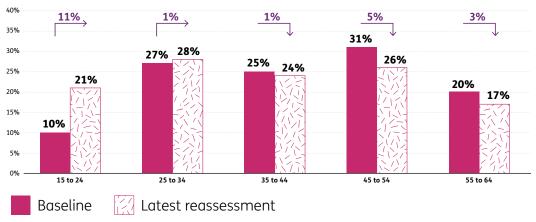

For participants aged 15 to 64 years with autism, 23% reported that they had a paid job at their latest reassessment. This compares to 23% for the Scheme as a whole.

Comparing responses at the most recent plan reassessment (between two to six years after entry) with responses at Scheme entry, there has been a:

- 7 percentage point increase from 16% to 23% for participants aged 15–64 years
- minimal movement from baseline at 27% for participants aged 25–64 years.

The chart below shows outcomes for different age groups.

Family and carer employment

Family/carers of participants with autism reported an employment rate of **52%**, which is **higher** than the Scheme average family/carer employment rate of **50%**.

Comparing responses at the most recent plan reassessment (between two to six years after entry) with responses at Scheme entry, there has been a:

- 5 percentage point increase from 47% to 52% for participants aged 0–14 years
- 4 percentage point increase from 50% to 54% for participants aged 15 years and over
- 5 percentage point increase from 48% to 52% for participants across all ages.

Choice and control

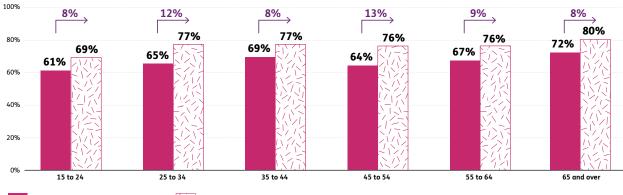

At 30 September 2022, **71%** of participants aged 15 years and over with autism said the NDIS has helped them have more choice and control over their life. This is **lower** than the Scheme average rate at **76%**.

Comparing responses at the most recent plan reassessment (between two to six years after entry) with responses at their first plan reassessment, there has been a:

- 9 percentage point increase from 62% to 71% for participants aged 15 years and over
- 11 percentage point increase from 66% to 77% for participants aged 25 years and over.

The chart below shows outcomes for different age groups.

Latest reassessment

For children aged 0 to before starting school

- 96% of parents and carers for children with autism thought the NDIS improved their child's
 development at their most recent plan reassessment, compared to 93% at their first
 reassessment. This is a 3 percentage point increase from the first reassessment.
- 97% of parents and carers for children with autism thought the NDIS improved their child's access to specialist services at their latest plan reassessment, compared to 93% at their first reassessment. This is a 3 percentage point increase from the first reassessment.

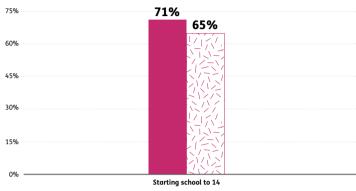

For children starting school to 14 years

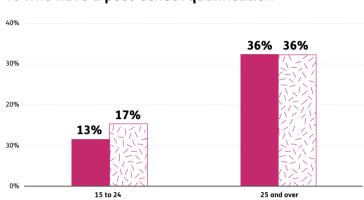

- 73% of parents and carers for children with autism felt their child had become more independent as a result of the NDIS at their most recent plan reassessment, compared to 63% at their first reassessment. This is a 10 percentage point increase from the first reassessment.
- **59%** of parents and carers for children with autism felt the NDIS has improved their child's relationship with family and friends at their most recent plan reassessment, compared with **51%** at their first reassessment. This is an **8 percentage point increase** from the first reassessment.

Education outcomes

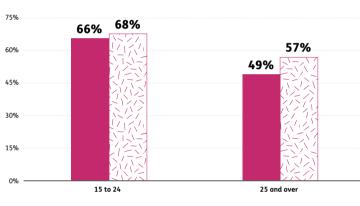

% of children attending school in a mainstream class

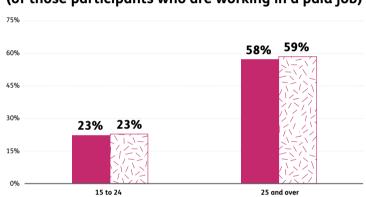

% who have a post-school qualification

% who get opportunities to learn new things

% who are working in an Australian Disability Enterprise (of those participants who are working in a paid job)

Baseline

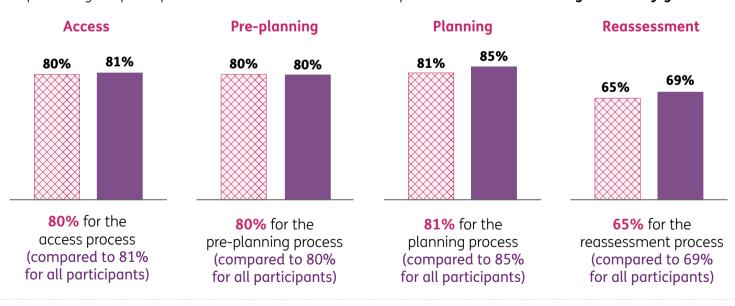

"Most of all I just want opportunities like everyone else. I want people to see me just as I am."

Ben, 27

Satisfaction

In the September 2022 quarter:

the percentage of participants with autism who rated their experience with the NDIS⁶ as **good or very good** was:

The weighted average satisfaction result for participants with autism who rated their experience as **good or very good** over the 4 stages of the pathway was **71%**.

- This was **72%** in the September 2021 quarter
- The overall Scheme weighted average satisfaction rate was **75%** in the September 2022 quarter.

Complaints

ts

There were **2,098** complaints raised by participants with autism in the September 2022 quarter

- (an annualised complaint rate of 4%⁷):
 The annualised complaint rate 12 months ago for participants with autism was 5%, 1 percentage point higher than the current quarter
- This compares to an annualised complaint rate of 7% for all participants.

Section 4: Providers

In the September 2022 quarter:

For providers supporting participants with autism:

providers received a payment⁸

of payments were received by the top 10 providers

of these providers were companies or organisations and **60%** were individuals or sole traders

For providers supporting participants with autism who **used a plan manager**:

providers received a payment⁹

of providers were registered and **82%** were unregistered¹⁰

was paid in the September 2022 quarter (**45%** of payments to participants with autism)

For providers supporting **agency-managed** participants with autism:

providers received a payment

of providers were registered

was paid in the September 2022 quarter (**34%** of payments to participants with autism)

For providers supporting **self-managed** participants with autism, **\$335m** was paid in the September 2022 quarter (which is **22%** of all payments to participants with autism). At this time, for self-managed payments, the total number of providers and the registration status of providers is unable to be determined since it is not a requirement for self managed participants to provide the ABN at the time of payment.

Key definitions

Definitions of terms used in this dashboard are consistent with those in Appendix A of the Quarterly Report to disability ministers published on the NDIS website.

SEIFA

1. The Australian Bureau of Statistics SEIFA Index of Education and Occupation (IEO) is used by NDIA to classify participants into socio-economic deciles, with decile one representing participants in the lowest socio-economic decile, and decile ten representing participants in the highest socio-economic decile. SEIFA deciles are allocated based on the Statistical Area 1 (SA1) that a participant lives in.

Payments

- 2. Supported Independent Living (SIL) is help with and/or supervision of daily tasks to develop the skills of an individual to live as independently as possible.
- 3. Average payments per participant are calculated using a 12 month period prior to the reporting date.
- 4. The average payment for the same group of participants is compared across two different time periods (12 months ending September 2022 vs 12 months ending September 2021). Payments for participants who had an initial plan approved after 30 September 2021 are not included.

Outcomes

5. The Participant Outcome section compares baseline results when participants entered the Scheme or at their first plan reassessment, with results measured at the most recent participant plan reassessment for each respondent. Results are for participants who have been in the Scheme for at least two years and NDIS trial participants are excluded. All outcome results are rounded to the nearest percentage but the percentage point increases or decreases are calculated based on the unrounded results.

Satisfaction

6. The NDIA gathers responses at the four primary stages of the participant pathway – access, pre-planning, planning and plan reassessment.

Complaints

7. The complaint rate is an annualised rate calculated as the number of complaints in the quarter divided by the active participant exposure in the quarter.

Providers

- 8. The count of providers is by ABN and includes providers supporting agency-managed participants, participants who use a plan manager and self-managed participants. Note that for self managed payments, the total number of providers is unable to be determined since it is not a requirement for self-managed participants to provide the ABN at the time of payment.
- 9. For each plan management type, a single provider is counted if they received a payment in the quarter for that plan management type. Note that a single provider can receive payments across more than one plan management type so may be included in more than one count.
- 10. A registered provider is an approved person or provider of supports who is registered with the NDIS Quality and Safeguard Commission. While a registered provider can provide supports to all participants, an unregistered provider can only provide supports to participants who use a plan manager or who are self-managed.
